BIORESONANCE ACCORDING TO PAUL SCHMIDT

RAYOCOMP PS 10

MODELS, MODULES AND MORE

Important note:

Please note that the information, advice and solutions given here are based on over 40 years of experience, but cannot replace a visit to a naturopath or naturopathically orientated doctor.

Furthermore, it is pointed out here and on the following pages that conventional medicine has neither accepted nor recognised the effect of bioenergetic oscillations, even if a clinical prospective, double-blind randomised, placebo-controlled study exists.

HIGHLIGHTS OF ALL RAYOCOMP PS 10 AND PS 10 PLUS MODELS

EASY TO USE

The Rayocomp PS 10 is incredibly straightforward to use. Setting up RAH programs, for instance, is both quick and easy.

MODULAR SOFTWARE STRUCTURE

Thanks to the modular software structure of our Rayocomp devices, we ensure the highest level of individuality in the device. Thereby, you purchase the modules according to your individual requirements and thus save costs.

EXTENSION KIT

The Extension Kit makes the Rayocomp PS 10 fit for the future again: Thanks to the Extension Kit, the PS 10 plus offers more space for future software updates and new modules, a longer battery life of at least 15 hours and significantly faster loading of RAH programs - just as fast as the Rayocomp PS 1000 polar 4.0.

Note: The Rayocomp PS 10 basic and Rayocomp PS 10 light do not require an Extension Kit for their scope of performance.

WITH ITS BUILT-IN RECHARGEABLE BATTERY AND LIGHTWEIGHT DESIGN, THE RAYOCOMP PS 10 IS INCREDIBLY PORTABLE.

While perfect for home use, is also convenient in the car or for travelling. Despite its integrated battery, the device is lightweight, making it easy to use on a mobile basis.

DEVICE DESIGN

The Rayocomp PS 10 draws inspiration from the colours and aesthetics of the Rayocomp PS 1000 polar 4.0, creating a cohesive and visually pleasing design and colour scheme across both devices. The Rayocomp PS 10 also features an impressively large, easy-to-read display.

SIMPLE UPDATE OPTION

The latest software can be downloaded from our servers in Lennestadt via the Rayocomp PS 1000 polar 4.0 and then installed on the Rayocomp PS 10 basic.

For the Rayocomp PS 10 plus, the software update is carried out using the supplied SD card.

MADE IN GERMANY

All of our products are developed at the distinctive Sauerland Pyramids in Lennestadt. Production takes place in our own factory using CO2-neutral, high-precision robotic processes.

USED AROUND THE WORLD

Our cause-orientated treatment approach based on Bioresonance according to Paul Schmidt is currently successfully applied in 46 countries around the world.

INDUSTRY-STANDARD HARDWARE

The hardware components used in the Rayocomp PS 10 adhere strictly to the latest industry standards, ensuring that each component meets rigorous quality criteria. Our commitment to fully complying with all European legislation is proudly reflected in the CE mark on our products.

FLEXIBLE PURCHASE OPTIONS

In addition to the option to buy, users also have the flexibility to rent the Rayocomp PS 10, software modules and accessories.

COMPREHENSIVE TRAINING

Upon request, you can receive guidance on how to operate the device.

THE RAYOCOMP PS 10 - MODELS

Art. no.: **21145**

RAYOCOMP PS 10 EVOLUTION PLUS

Base unit for integrating your choice of modules

With the Rayocomp PS 10 Evolution plus, we have created a mobile bioresonance device that will accompany you on your journey to a personal sense of well-being. The primary goal of treatment using the Rayocomp PS 10 Evolution plus is to improve quality of life. When you invest in a Rayocomp PS 10 Evolution plus, you receive a **base unit that you can customise by adding modules to suit your preferences and needs.**

Art. no.: **21110**

RAYOCOMP PS 10 VET PLUS

Base unit designed to integrate your preferred veterinary modules

Introducing the Rayocomp PS 10 VET plus, your go-to **mobile bioresonance device for veterinary medicine.** Users can conduct a complete energetic check on both small and large animals, which provides an **overview of their current health status from an energetic perspective.** With the Rayocomp PS 10 VET plus, you can energetically test organs such as the heart, liver, kidneys, as well as the musculoskeletal system and psyche. Following these tests, a personalised treatment plan can be crafted for the animal based on the results.

The Rayocomp PS 10 VET plus is supplied as a base unit. Additional modules, such as module M11 'RAH VET for analysis and harmonisation' (art. no. 20098) and, derived from this, module M6 'RAH Global Test VET' (art. no. 20097), can be purchased separately.

Art. no.: **20106** **RAYOCOMP PS 10 LIGHT**

The perfect set for beginners

The Rayocomp PS 10 light, coupled with the module M8 (art. no. 20085) and the Fabric Detector: fitted sheet (art. no. 30323), forms the perfect combination for beginners venturing into the realm of Bioresonance according to Paul Schmidt. This value set encapsulates decades of experience in the form of **Compact Programs**: Since Bioresonance according to Paul Schmidt is used successfully in both human and veterinary medicine in 46 countries around the world, module M8 contains the most important Compact Programs from both fields. There are currently 63 Compact Programs in the human field and 103 in the veterinary field (horses, dogs, and cats). **Beginners can easily apply Bioresonance according to Paul Schmidt with these 166 Compact Programs, benefiting both themselves and their animals.**

The perfect set for treating clients wherever they are

Recent trends show a growing number of bioresonance practitioners are embracing the key advantages of the Rayocomp PS 10 for their own needs. Featuring a built-in battery and a lightweight design, this Bioresonance device is portable and user-friendly, making it an ideal choice for treating clients in the comfort of their own homes. Once the Rayocomp PS 1000 polar 4.0 identifies the necessary individual fundamental frequency values and RAH programs for a person or animal, practitioners can save them on a Green-Card (art. no. 359). This Green-Card can then be used for harmonisation in the client's home. When you consider the duration of the treatment and the treatment plan, opting to rent a Rayocomp PS 10 basic may be a practical choice. Clients have the option to rent the device either from their practitioner or directly from their distributor. Regardless of whether you decide to rent or buy your own personal bioresonance device, both options have been proven to be beneficial. Experience indicates that having the device within the family often prompts other members to consider treatment. For additional users, a personalised Green-Card issued by the practitioner is all that's needed. This approach can frequently cut the cost per user by half or even two-thirds. Whatever you choose, the Rayocomp PS 10 basic allows you to reduce travel, save time and reduce costs while effortlessly implementing your personalised treatment plan from anywhere in the world.

This device is specifically designed for harmonisation using the Green-Card provided by your practitioner.

Art. no.: **20100**

RAYOCOMP PS 10 MED.

Successfully treating chronic pain

The Rayocomp PS 10 med. is the mobile bioresonance device with medical product approval that can be used to relieve pain in patients with cervical spine syndrome, among other things. The **effectiveness was demonstrated in a clinical prospective, double-blind randomised and placebo-controlled study**. The study also confirms the safe and effective use of Bioresonance according to Paul Schmidt for patients and therapists.

The Rayocomp PS 10 med. can be used under therapeutic supervision, for example as a home therapy device for patients: By using the Compact Program 71.60 'Pain syndrome cervical spine', therapies for the treatment of chronic pain can be carried out with this device in accordance with the intended purpose of this Class IIa medical device.

Art. no.: **21205**

RAYOCOMP PS 10 PLUS SET

The set with Green-Card and Fabric Detector (fitted sheet)

We offer the Rayocomp PS 10 plus in an attractive value set. In addition to the Rayocomp PS 10 Evolution plus, it also contains a fitted sheet as a Fabric Detector and a Green-Card. Also included is the module M10 and thus the RAH Human for analysis and harmonisation.

This device provides therapists and private users with the optimum basis for energetic analysis and treatment at an advantageous price compared to the individual purchase of the products.

Of course, all other modules can also be integrated and used with the Rayocomp PS 10 plus.

Art. no.: **21130**

RAYOCOMP PS 10 COMPLETE PLUS

The value set in the Samsonite® Aluminium Trolley

Years of experience with the Rayocomp PS 10 have shown that most long-term users wish to make use of the full range of BaPS and RAH software modules. The Rayocomp PS 10 Complete plus includes the modules M1, M2, M4, M7, M8, M9 and M10, which are bundled together at a favourable price when compared to purchasing the modules individually.

Designed for professionals in the human field, the Rayocomp PS 10 Complete plus is also an excellent choice for experienced home users. This bioresonance device is available in a set with a high-quality Samsonite® Aluminium Trolley (art. no. 26206). The compact size of the trolley ensures easy transport, making it an ideal solution for mobile practices, veterinarians, presentations, and holidays.

Art. no.: **21137**

RAYOCOMP PS 10 COMPLETE PREMIUM PLUS

The universally applicable complete package in a Samsonite® Aluminium Trolley

The Rayocomp PS 10 Complete Premium plus is our high-quality complete version of the mobile bioresonance device. With this model, we provide you with the entire software scope of 12 modules for both, human and veterinary applications. All test and harmonisation options from the areas of BaPS and RAH are therefore combined in this compilation. For the mobile application of Bioresonance according to Paul Schmidt in the human and veterinary sector, you will receive the Rayocomp PS 10 Complete Premium plus in a high-quality Samsonite® Aluminium Trolley.

RECOMMENDED STANDARD EQUIPMENT

We recommend incorporating a fitted sheet as a Fabric Detector (art. no. 30323) and a Green-Card (art. no. 359) as essential accessories for each specific Rayocomp PS 10 model or chosen set.

The Rayocomp PS 10 light (art. no. 20106) and the Rayocomp PS 10 plus Set (art. no. 21205) are supplied as standard with the Fabric Detector: fitted sheet.

e.g.

POPULAR ACCESSORIES AMONG OUR CUSTOMERS IN THE HUMAN AND VETERINARY SECTOR

Art. no.:	Description
359	Green-Card
30323	Fabric detector: fitted sheet
30335	Fabric Detector with Velcro, short
318	Foot Detector (pair) Note: Also suitable for use in the veterinary sector. The detector is placed under the animal, which allows easy testing and harmonisation.
319	Hand Detector (pair)
330	Protection Cup
378	Measuring Cup
30360	Fabric Detector: horse blanket
30365	Fabric Detector: large dog
30366	Fabric Detector: small dog

RAYOCOMP PS 10 - OVERVIEW OF MODELS AND MODULE CONFIGURATIONS

Rayocomp PS 10	Art. no.:	Included modules (additional modules available as an optional extra)											
		M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12

basic	20125	•				•	•		(•)	•		•	•
plus Set	21205							(•)	(•)	(•)	•		

The modules in brackets are already covered by other modules included in the respective model. For example, module M8 is part of module M9 and modules M7, M8 and M9 are included in module M10.

RAYOCOMP PS 10 - MODULE OVERVIEW

Art. no.:	Description
20010	M1: Setting accuracy of FFVs (0.05)
20022	M2: Bioresonance according to Paul Schmidt
20024	M3: RAH Phytotherapy
20040	M4: Programs according to Dr Elmar Ulrich
20055	M5: RAH Global Test Human
20097	M6: RAH Global Test VET
20075	M7: Building biology
20085	M8: RAH Compact Programs
20090	M9: RAH Human for harmonisation
20092	M10: RAH Human for analysis and harmonisation
20098	M11: RAH VET for analysis and harmonisation
20023	M12: RAH C-Module

The high-quality Samsonite® Aluminium Trolley (art. no. 26206) is also available as an optional extra for bioresonance devices which are usually supplied without a case. This aluminium trolley serves as the perfect accessory for Bioresonance according to Paul Schmidt.

Its robust yet stylish design, coupled with generous storage space for the bioresonance device and its accessories, makes the trolley a dependable and secure companion for using the Rayocomp PS 10 and Rayocomp PS 10 plus on the go.

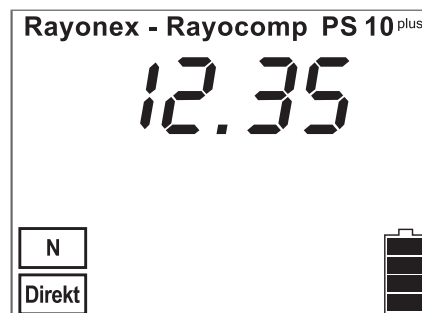

DIE RAYOCOMP PS 10 - MODULES FOR THE HUMAN SECTOR

M1: SETTING ACCURACY OF FFVS (0.05)

Art. no.: **20010**

This module can be used to increase the standard accuracy of the fundamental frequency values from 0.25 (e.g. 10,25; 10,50 ...) to an accuracy of 0.05 (e.g. 10,25; 10,30 ...).

M2: BIORESONANCE ACCORDING TO PAUL SCHMIDT

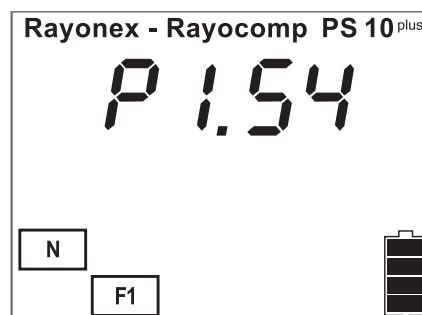

Art. no.: **20022**

The simplicity of the 54 harmonisation programs of BaPS (Bioresonance according to Paul Schmidt) presents an excellent opportunity to harness the potential of numerous tests. This allows you to explore the resonance values commonly associated with a regulatory range.

Module M2 contains acupuncture oscillation therapy, including the 14 meridian programs, the special programs and the test programs, which can be used in the form of automatic harmonisation.

The programs in module M2 are all based on Paul Schmidt's original research. The RAH with its modules (M5 - M12) is now the more powerful system due to its greater variety and increased medical structure.

M3: RAH PHYTOTHERAPY

Art. no.: **20024**

The module M3: RAH Phytotherapy expands the RAH system of the Rayocomp PS 10 plus with 98 programs with plant-related frequency spectra.

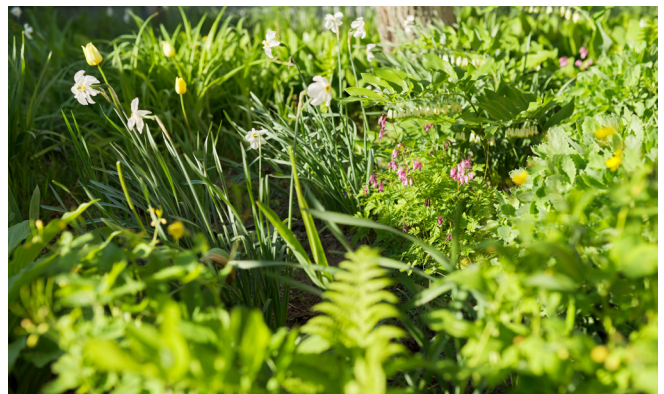

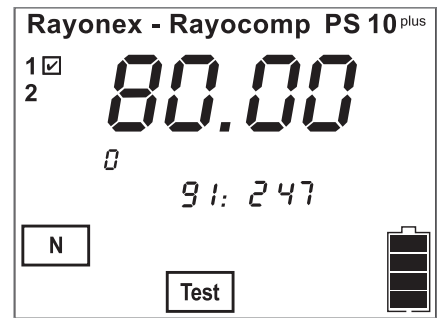

Phytotherapy uses the properties of plants to promote general well-being in a natural way. Within Bioresonance according to Paul Schmidt, these programs are used for energetic analysis and individual testing.

Using the level testing function, you can switch directly from the main program to the detailed programs and perform specific tests there. Once the selected programs have been saved, they are available as usual for energetic harmonisation.

Application: Once the module has been activated in Rayocomp PS 10 plus, the programs are available in the RAH system. Selection is made manually or via level testing on the Rayotensor.

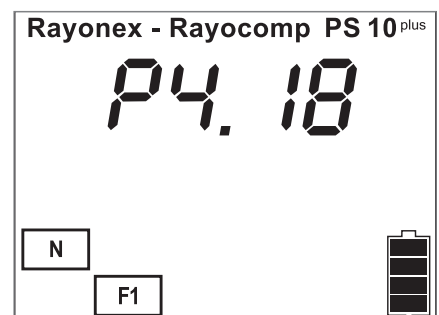

An activated module M9 or M11 is required for use.

M4: PROGRAMS ACCORDING TO DR ELMAR ULRICH

Art. no.: **20040**

Dr Elmar Ulrich has developed his own combinations of fundamental frequency values and when integrated into the Rayocomp PS 10 plus, a total of 22 different harmonisation programs become available.

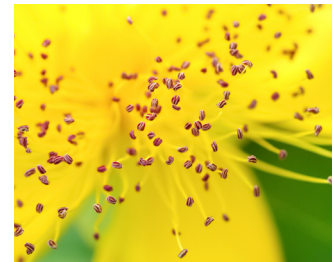

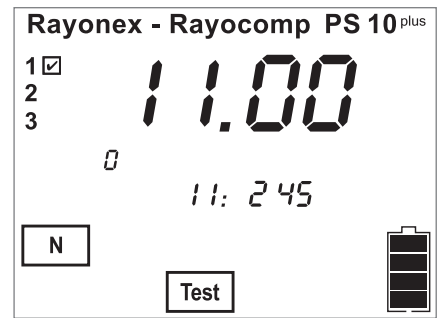

M5: RAH GLOBAL TEST HUMAN

Art. no.: **20055**

Energetically testing and harmonising incompatible and harmful substances are key applications of Bioresonance according to Paul Schmidt. Module M5 enhances the capabilities of the Rayocomp PS 10 plus by providing a compilation of 21 superordinate areas and a total of 698 RAH programs within the RAH 11.00 to RAH 18.99 range. With the level test, you can quickly jump from superordinate areas to detailed areas and test them by clicking on the Rayotensor.

Please note that the use of this module requires the module M9 (art. no. 20090) or M10 (art. no. 20092) to be activated in the Rayocomp PS 10 plus.

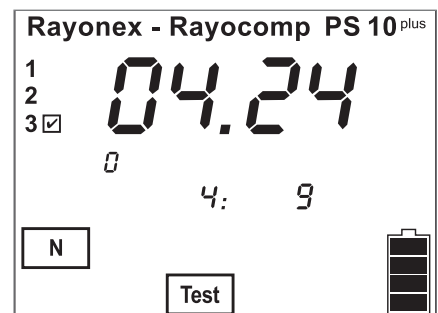

M7: BUILDING BIOLOGY

Art. no.: **20075**

In the field of building biology, the technician has access to 226 RAH programs for assessing factors such as electrosmog, geopathy, pollutants, and common pathogens like bacteria or fungi.

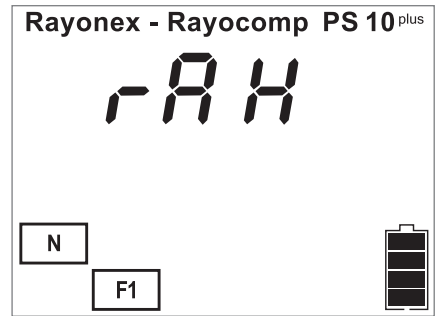

The RAH programs of module M7 are included in module M10 (art. no. 20092).

M8: RAH COMPACT PROGRAMS

Art. no.: **20085**

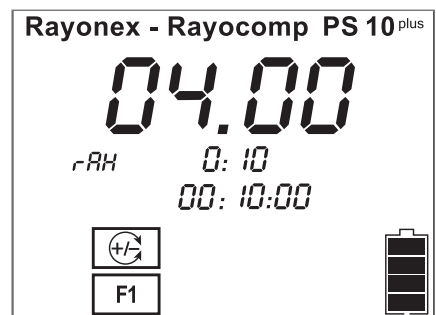

The module M8 serves as the entry-level module into the world of the Rayonex Analysis and Harmonisation system (RAH). Containing important Compact Programs from both human and veterinary fields, module M8 offers a total of 63 Compact Programs for human use and 103 Compact Programs for veterinary use (horses, dogs, and cats). Users who wish to explore Bioresonance according to Paul Schmidt in greater depth beyond the initial Compact Programs have the option of upgrading to module M9 (art. no. 20090), M10 (art. no. 20092) or M11 (art. no. 20098).

M9: RAH HUMAN FOR HARMONISATION

Art. no.: **20090**

Module M9 offers access to a comprehensive collection of over 1,800 RAH programs designed for use in the human sector. This module is the ideal choice for those who wish to use RAH programs for harmonisation purposes, whether in a professional practice or at home. Individual harmonisation times can be stored for each program, allowing users to customise and determine the duration of harmonisation according to their specific needs.

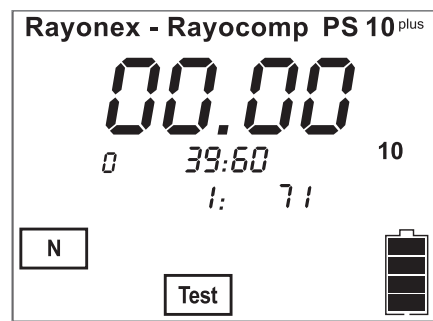

M10: RAH HUMAN FOR ANALYSIS AND HARMONISATION

Art. no.: **20092**

The module M10 is the top-of-the-range human module in the Rayocomp PS 10, containing all primary and detailed analysis and harmonisation programs with the Rayonex Analysis and Harmonisation system (RAH). The RAH Human serves as an open expert system, allowing practitioners to continuously add new treatment programs. Users have the flexibility to employ any of the more than 1,800 RAH programs available for both harmonisation and energetic testing. Controlled through a level test, users can easily select and test subordinate RAH program levels when a superordinate RAH program is chosen. The convenience extends to the fact that RAH program numbers do not need to be entered individually and are readily available for testing at the touch of a button.

Module M10 also provides Test Protocols for specific illnesses and holistic, proven compilations of RAH programs that can be used to resolve energetic deficits. These Test Protocols guide users through the RAH, ensuring that programs align with the client's medical history. The test results can be stored on a Green-Card and used for harmonisation.

M12: RAH C-MODULE

Art. no.: **20023**

The module serves as a development platform within the RAH for frequency spectra associated with cell degeneration. Its purpose is to use Bioresonance according to Paul Schmidt and the RAH to reveal correlations, risks and causes of cell degeneration and to provide new insights into a cause-oriented treatment approach. The module M12 can be used for energetic testing and harmonisation as well as for preventive purposes. The use of the module M12 is subject to a contractually agreed code of use.

The module M10 (art. no. 20092) has to be activated in order to use this module.

THE RAYOCOMP PS 10 - MODULES FOR THE VETERINARY SECTOR

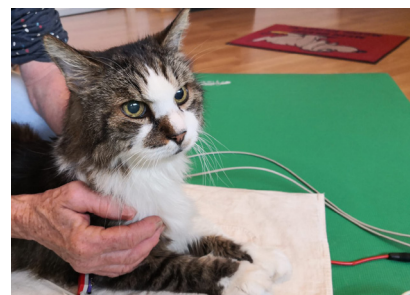

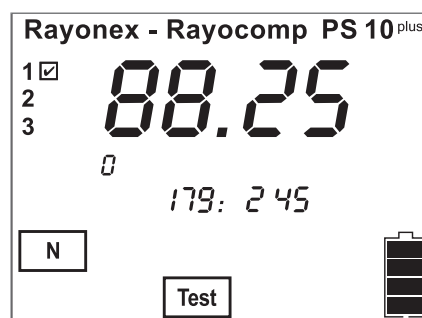

M6: RAH GLOBAL TEST VET

Art. no.: **20097**

Module M6 enhances the Rayocomp PS 10 plus with a comprehensive compilation of 11 superordinate areas and a total of 97 RAH programs in the RAH 19.00 to RAH 19.99 range. This enables energetic testing for feed incompatibilities and contaminants in the veterinary sector. Convenient level testing allows users to move seamlessly from superordinate areas to detailed areas for thorough testing with a simple click of the Rayotensor.

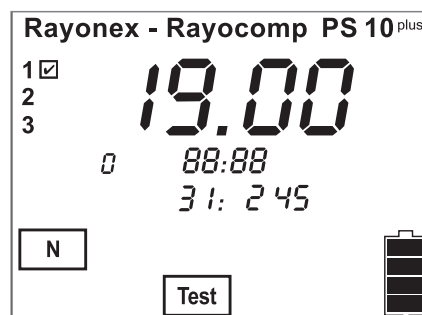

The module M11 (art. no. 20098) has to be activated in order to use this module.

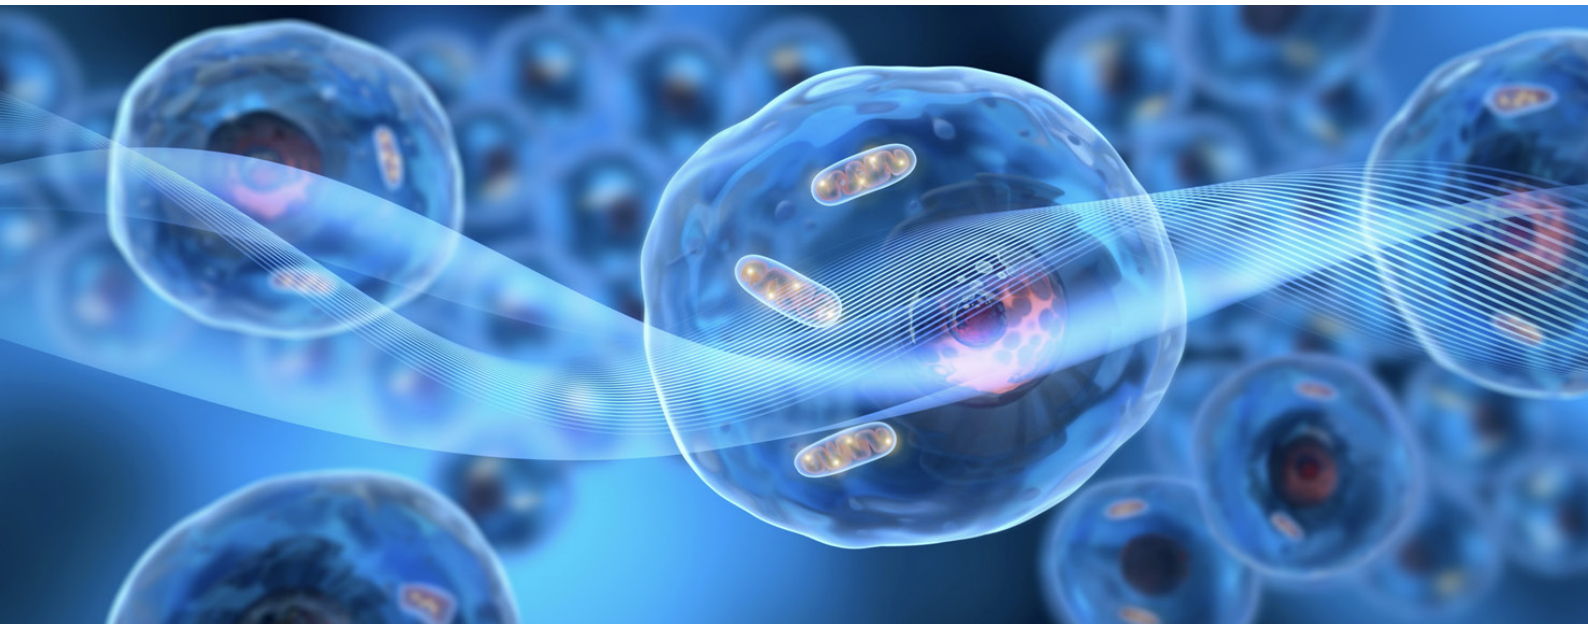

M11: RAH VET FOR ANALYSIS AND HARMONISATION

Art. no.: **20098**

The frequency structures, meticulously developed and refined over many years for human applications, are now accessible for horses, dogs, and cats through a dedicated veterinary module. The RAH VET module offers a unique combination of programs, ensuring a swift and direct approach to energetic testing and harmonisation. Both physiology and pathology programs have been developed - specifically for horses, dogs, and cats. The module contains specific system programs that integrate both pathogen and pathology frequencies.

SCIENTIFIC STUDIES, RESEARCH WORK AND PUBLICATIONS

Fraunhofer Institut

- ▶ Efficacy study on the Rayonex Biomedical device systems

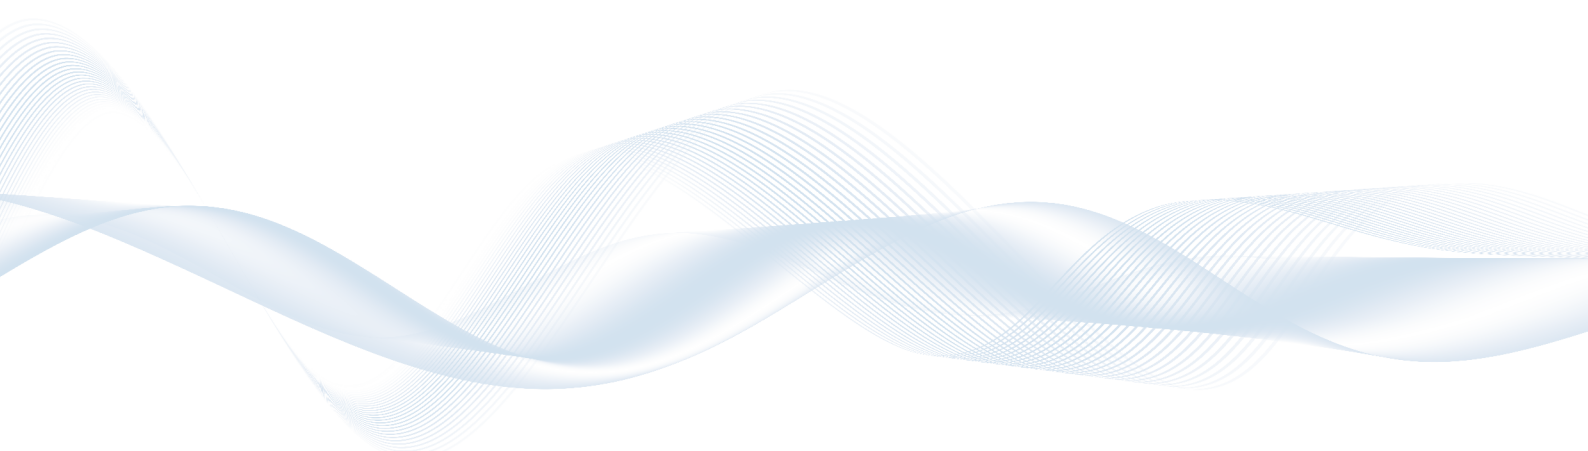

- ▶ Double-blind randomised, placebo-controlled, clinical prospective study in patients with cervical spine syndrome

- ▶ In vitro studies on the activation of cell metabolism in organ-specific cell cultures using the Mini-Rayonex

Further information on scientific studies on the cause-oriented treatment approach of bioresonance according to Paul Schmidt is available at rayonex-biomedical.de.
